EXCLUSIVE FEATURES

AUTOMATIC AIR CONTROL (PATENT #: US 7,325,541 B2)

The combustion of the insert is regulated automatically by this innovative control. Once activated, it gradually reduces the combustion air to the user's desired burn rate.

BUILT-IN BARBECUE

A barbecue grill is stored inside the firebox to allow its users to cook their favorite meals when the wood is reduced to embers.

BAFFLE DESIGN & SECONDARY AIR (PATENT # 9/476,593)

The secondary air enters the firebox through a perforated baffle in a downward direction to mix with the rising gases of the wood to create a unique arrangement of natural and appealing flames that prolongs the combustion, increases the efficiency and reduces the emissions.

PREMIUM QUALITY BLOWERS (125 CFM EACH)

The Fusion comes equipped with two heat-activated blowers and a variable speed control that promotes the distribution of warm air into the room.

UNIQUE DOOR OPERATION

Our unique door handle has an ergonomic design that is durable, user-friendly and allows the door to remain hermetically shut by means of a latch for a secure operation of the fireplace insert.
